## EDUCATION

|                                                                                                                      |                  |
|----------------------------------------------------------------------------------------------------------------------|------------------|
| <b>P.E.S. Modern College of Engineering</b><br><i>B.E. Artificial Intelligence &amp; Machine Learning (GPA: 8.1)</i> | Pune — 2022–2026 |
| <b>Loyola High School &amp; Junior College</b><br><i>X: 84.2%, XII: 67%</i>                                          | Pune — 2010–2022 |

## TECHNICAL SKILLS

**Languages:** Python, Java, JavaScript, SQL, C++  
**Backend:** Django, Django REST Framework, Flask  
**Frontend:** ReactJS, HTML, CSS  
**Databases:** PostgreSQL, MongoDB, SQLite  
**AI/ML/NLP:** LangGraph, LangChain, Transformers, scikit-learn, pandas, spaCy  
**Cloud:** Docker, Azure, AWS

## EXPERIENCE

|                                                                                                                                                                                                                                                                      |                      |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------|
| <b>R&amp;D Intern</b><br><i>PureID Pvt. Ltd.</i>                                                                                                                                                                                                                     | Jan 2025 – Sept 2025 |
| <ul style="list-style-type: none"><li>Developed and deployed a Django-based customer requirements discovery platform from scratch with role-based authentication, admin dashboard, PostgreSQL integration, and Azure deployment.</li></ul>                           |                      |
| <b>Treasurer, CODE Club (AI-ML) — Member, CSI</b><br><i>P.E.S. Modern College of Engineering</i>                                                                                                                                                                     | 2023 – Apr 2025      |
| <ul style="list-style-type: none"><li>Built backend features for a Django quiz platform used by 100+ students with certificate generation and event management.</li><li>Organized technical seminars on web development, IBM Cloud, and computer graphics.</li></ul> |                      |

## PROJECTS

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |                                                                     |
